

## Every Inch of My Nerves

Oh a mile is five-thousand two-hundred eighty feet, fifty-two eighty, five two eight oh.  
And everybody knows that a foot is twelve inches, twelve inches, inches in length.  
That's sixty-three thousand three-hundred sixty inches in a mile,  
That's sixty-three thousand three-hundred sixty inches in a mile,

Oh the average body has forty-five miles of nerves, forty-five, forty-five miles,  
That's two-million eight-hundred fifty-one thousand two-hundred inches of nerves,  
inches of nerves,

And you are getting on every inch of my,  
You are getting on every inch of my,  
You are getting on every inch of my nerves.
